

Power Distribution and Transmission Factsheet

Commercial Management & Dispute Resolution/Avoidance Services

For over 25 years, DGA Group has been providing Commercial/Contract and Programming services to the construction industry throughout its global network. During this time, DGA has provided engineering and construction focused services to the power distribution and transmission sector on numerous landmark projects. Our consultants have an in-depth understanding of the technical and commercial issues which often arise during the project life cycle and can provide the following services:

- Contract management and commercial support to live projects;
- Assessment of project change (both time and quantum);
- Preparation and negotiation of Contract Final Account.
- Preparation of claims for extension of time and loss and expense;
- Programming and forensic delay analysis; and
- Dispute management;

Below is a selection of the most recent projects which our consultants have assisted both main contractors and specialist sub-contractors in this technical field:

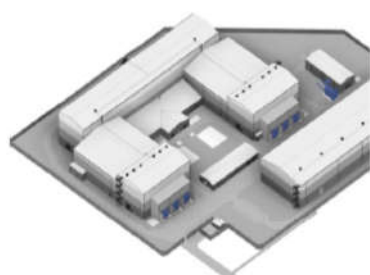

Project	East Anglia One – Offshore Wind Farm – HV Cable Installation	
Location	Suffolk	
Services	Contract Administration Final Account Summary Take Off	Commercial Management Quantity Surveying
Role	<p>Provision of commercial team for the HV cable installation contractor for this large power contract. The works included in the installation of 6 underground HV cables 37km from the coast to a new substation which connects to the National Grid.</p> <p>The DGA team undertook all commercial functions on the project including subcontract management, valuations, reporting, change and general commercial functions, together with implementing a commercial strategy with claims to turn the project around and generate a margin for the Contractor.</p>

Project	Commercial Support - Prysmian Cables & Systems Limited	
Value	£10m	
Location	Scotland	
Services	Claims Management Contractual Advice Final Account Summary	Commercial Management Contract Administration
Role	This project involved post contract administration on 4 Nr projects for Prysmian Cables. They were involved in a framework agreement with Scottish Power for the manufacture, supply and installation of electrical cables and associated equipment to link windfarm generated electricity to the national grid. The projects required full post-contract commercial administration together with claim support.	

Project	Blyth Converter Station – Construction of HVDC Converter Station for North Sea interconnector link.	
Value	£30M	
Location	Blyth, Northumberland	
Services	Claims Management Quantity Surveying	Dispute Resolution
Role	DGA were appointed to provide support to the main contractor for the construction works in identifying entitlement to additional time and money arising from critical employer delay events and then preparing substantiated claims. Once the claims were submitted DGA worked with the client’s legal team to provide quantum assistance as formal dispute resolution proceeded.	

Project	London Power Tunnels	
Value	£50 million	
Location	UK	
Services	Contractual Advice Contract Admin and Management	Delay Analysis
Role	This contract was for the installation of 35km of 400kv HV cables into pre constructed tunnels up to 60m below ground and to then deliver the cable ends to the newly constructed substation above ground. DGA provided the commercial team to this project in commercial trouble, they were able to negotiate an EoT with costs and deliver a margin. DGA supported the Contractor in negotiating an £11m package for an additional 11km of additional cable installation works.
